

Holtspur Bottom Butterfly Reserve plant list 2014

In 2014 Marylene Mansfield-Williams (MMW), Dick Lister (DL), Phil Newberry (PN), Caroline Waddams (CW), and Charlie Durigan (CD) undertook a number of plant surveys at Holtspur Bottom on behalf of Butterfly Conservation who manage the reserve. The surveys took place between March 2014 and August 2014 (though see *Notes on Bryophytes* below).

The list below includes the plants they recorded, and when (in the column headed "2014").

The list also includes plants which were identified in a previous survey undertaken on 24 June 1999 by Patrick Boston at Holtspur Bottom (in the column headed "Pre 2014 & Holtspur Bank species", these are identified as "1999").

It also includes plants identified in the adjacent Holtspur Bank Local Nature Reserve (LNR), from a list published by the Friends of Holtspur Bank LNR in December 2007. (In the column headed "Pre 2014 & Holtspur Bank species", these are identified as "Holtspur Bank"). We have no further details of this survey.

The "Recorded by" column shows who recorded the plant. The entry "Not found" in this column means that although the plant had been recorded previously, either during the 1999 survey of Holtspur Bottom, or on Holtspur Bank LNR, it was not found during the 2014 survey of Holtspur Bottom.

Note on Bryophytes

Some entries in this section simply give 2014 as the date recorded. These were recorded between January and March 2014, though the exact date is currently not available.
